INTRODUCTION:

Industrial Automation is a perfect synergy of Artificial Intelligence, Machine Learning Technology, Bigdata, Embedded Systems, Sensor Networks and Robotics. With the advent of smart home, smart-city and smart-healthcare, there is a demanding growth in the need for research in Industrial Internet of Things (IIoT). IoT and Automation play a major role in quality control and in maintaining the overall efficiency of supply chain management. One of the greatest challenges faced by researchers working in the area of IoT and Automation is interoperability issue, since in a manufacturing industry, different machines use different protocols and architectures. Despite this issue, IoT and Automation , serves its best in integrating integrations and operations of an industry. This special session targets on state-of-the-art surveys, research articles and portrayal of challenging research projects in the field of IoT and Automation.

RECOMMENDED TOPICS:

Topics to be discussed in this special session include (but are not limited to) the following:

- **Home Automation**
- **Robotics**
- **Embedded Engineering**
- **Smart Hospitals**
- **Smart Farming**

- **Industrial Automation**
- **Remote Monitoring and Controlling**
- **Energy Management**
- **Challenging Research Issues in IoT and Automation**

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this special theme session on **IoT and Automation on or before December 01st, 2017**.
